

(Press Release)

New Streamlined CE Compliance Program Saves Time

One of the problems manufacturers face when getting their product to market is the time-consuming process of meeting EMC and Product Safety Compliance Standards. Manufacturers must often approach several

Their NARTE certified engineers are specifically trained in troubleshooting and problem solving.

D.L.S is a NVLAP certified EMI/RFI test facility, an EMC CAB (Competent Body), and an R&TTE CAB (Notified Body) for Europe. D.L.S. Conformity Assessment (D.L.S.'s product safety lab) offers testing and consulting to UL, CSA, CE, LVD, TUV & IEC requirements. D.L.S also is a certificated UL agency, TUV partner lab and can provide NRTL and third party certifications.

Four times a year, D.L.S. provides a four-day introduction and design class on EMC.

For more information on any of the above, please

different agencies in order to meet all the necessary standards.

D.L.S. Electronic Systems, Inc., is now offering a one-stop combined EMC and Product Safety Compliance package that involves multiple regulations simultaneously, thereby saving manufacturers immeasurable time.

This new streamlined CE Compliance program is specialized for Medical, Laboratory, Control, Measurement and Analytical/Preparation Equipment. It incorporates both EMC and Product Safety in one package. By taking a parallel path, this greatly reduces the time for compliance to IEC and EN 60601-1-2 and IEC and EN 61010-1 specifications to a matter of days. D.L.S. can also provide CB Scheme certification for global compliance requirements through their partner lab program.

Company Background:

D.L.S. Electronic Systems Inc. is one of the world's largest EMC facilities with 13 EMC Labs, a Product Safety Lab, and 4 RTCA/Military Labs in Wheeling, IL, plus 3 OATS Labs in Genoa City, WI. This allows them to offer manufacturers a one-stop compliance package with unprecedented scheduling flexibility.

Help Fight SPAM by Reporting Incidents

The Internet is an increasingly important place to work, play and learn for both adults and children. At the same time, we are concerned about the risks we face online. The challenge is to stay "one-click" ahead of would-be pornographers, hackers, child-predators and those who would misuse your and your family's sensitive information.

Facts About Spam: "12 to 15 percent of total e-mail traffic is spam - a year ago, that figure was closer to 7 percent." (Brightmail June 27, 2002)

How Can I Take Action?

- * Report to the Federal Trade Commission (FTC)
- * Report to your Internet Service Provider (ISP)
- * Report to Law Enforcement

The FTC wants copies of your unwanted e-mails and e-mails that have deceptive unsubscribe links. They use the unsolicited e-mails stored in their database to pursue law enforcement actions against people who send de-

BRAVO-ZULU

Subject: FCC Commercial Tests
I am dropping you at NARTE Headquarters this line to say thanks for the tremendous service. I took a battery of commercial tests through NARTE at the Portland ITT Tech offices a couple of weeks ago. My licenses came in the mail yesterday. I had tried three times to get tested by one of the other COLEMS, and they were a disappointing mess. I never did work it out with them. But one email to you at NARTE did the trick. The wait for the test was short, the test was administered professionally and in an appropriate setting. All test materials were beautifully printed. The grading was done at NARTE and the license issued within a week and a half of the test.

The cost to me was \$40. I believe that NARTE must lose money on the tests at that price.

Anyway, I am well pleased with the service I got from NARTE Headquarters on the NARTE FCC Commercial testing program, and wanted you to know.

*Thanks again,
Steve Russell
FCC GROL (Radar)*
