Feedback

Letters to the Editor

NARTE Certification Support

The following comments were included in a letter to NARTE Headquarters on another matter. They are by Stephen Matern, a NARTE member (Master Tele Engineer & Technician) since 1984. They are reprinted here in appreciation. (Ed.)

I very much support the NARTE efforts for licensing and verification of expertise. I believe that the government agencies that have personnel installing and maintaining RF radiating equipment would be well served to require or, at the least, encourage their employees to obtain and maintain independent certification. Several of the agencies under the Department of Energy do not.

Stephen E. Matern, NCE,
NCT, Moses Lake, WA

On Lou Gnecco's "Trade Secret" Article

Nice article in the Fall 2003 NARTE News (pp20) "Are Trade Secrets Replacing Patents". I just wondered about that other choice, non-disclosure agreements. How well do they stand up? What if someone uses what they learn from those type systems and makes their own? Then you are involved in expensive litigation, right? And what about inadvertent

disclosure...say a reviewer or engineer throws out some of their papers and they get picked up by a garbage can reader?

I'm also interested in what you hint at in the end of the article, the silver lining! Thanks for your article and your time,

Richard (Randy) Lancaster
NTIA (Office of Spectrum
Management)
SPS Chairman

Lou—Any comments? (Ed.)

Always Good to Hear

Dear NARTE,

The NARTE News publishing staff gets an A++ for the straightforward summary and arrangement of the e-magazine.

It is one of the first e-publications I have received that delivers it's message in an effective form. Keep up the good work!

Tim Dwyer
EMC Program Manager
EMC & Telecom Division
TUV Rheinland of North
America, Inc.

Whoops!

In the NARTE member profile (Fall 2003 issue), Dr. Nandalall Sukhdeo's name was incorrectly spelled. We regret the error.
